

Air Cooled Condensing Units

STANDARD FEATURES

UNIT CONFIGURATION

Low Profile
Base Rail Configuration
Multiple Rigging Points
Removable Access Panels
Hinged Control Panel Access

COMPRESSORS

Energy Efficient Copeland Discus Compressors (C Series)
Compressors Service Valves
Internal Compressor
Overload Protection
Compressor fusing (CD & CM Units)
Crankcase Heaters
Compressor Contactors
Time Delay Compressor Start (CD Units) & CM

ELECTRICAL COMPONENTS

Fused Control Circuit
Prewired Controls
Auto / Demand Pump down Switch

CONDENSER

Direct Drive Condenser Fans
Polyvinyl covered fan guards
Three phase motors with permanently lubricated ball bearings

Fan staging head pressure control to +200F.
Sub-Circuit fan motor fusing with internal overload motor protector

Fan Motor Contactor
Plate Fin/Full Tube Collar
Condenser Coils
Baffled condenser plenum
True subcooling
Personal Grills (CM UNITS)

REFRIGERANT CIRCUIT

Liquid Line shut off valve with charging port
Oil Failure Switch per each Compressor ("C" type Compressors)

High Pressure safety control
Low Pressure operating control
Shipping and Holding charge (Dry Nitrogen)

Page 22 of 22

The diagram illustrates the components of the Nomenclature code **LU13042H**. The code is broken down into four main sections, each with a corresponding label and list of options:

- Compressor Type**: L - Scroll
- Condensing Unit Series**: I - Indoor O - Outdoor
- Refrigerant Type**: 4 - R 404a, 2 - R 22
- Temperature Range**: H - High, M - Medium, L - Low, XL - Ultra Low

The Nomenclature code is shown as **LU13042H**, with the letters **LU** and **H** corresponding to the Compressor Type and Temperature Range respectively, and the numbers **13042** corresponding to the Condensing Unit Series, Refrigerant Type, and Nominal Horsepower.

Construction Features

Compressor U.L. listed Copeland Compliant Scroll type. Each compressore is equipped with suction and discharge service valves with gauge ports, inherent three pahse overload protection, crankcase heater.

Standard Features

TERMS OF SALE:

Net 30 day, FOB Pryor, OK

FREIGHT TERMS:

All shipments are FOB our plant, with freight allowance to the first destination within the continental United States, excluding Hawaii and Alaska, on shipments of 600 pounds or more.

Air Cooled Condensing Units

TERMS OF SALE: Net 30 days, FOB Pryor, Oklahoma

FREIGHT TERMS: All shipments are FOB our plant, with freight allowance to the first destination within the continental United States, excluding Hawaii and Alaska on shipment of 600 pounds or more.

Air Cooled Condensers

Nomenclature

PFC - 4

Air Cooled Condenser — Capacity (tons)

Century Refrigeration Air Cooled Condensers are designed for commercial and industrial applications. The PFC series, for outdoor applications, utilizes R-22, R-404a & R-507 refrigerants. It comes completely piped and wired, featuring a low profile and vertical air discharge. It also utilizes a unique horizontal condenser coil design and high volume condenser fans. The Century design is unaffected by wind direction or extreme weather conditions.

AVAILABLE OPTIONS

Exterior paint to blend with adjacent structures. Gray is the standard color. (consult factory)

Copper fin Coils are available for use in toxic atmosphere where like metals are required. (consult factory)

Acrycoat 3 fin coating for corrosive or coastal environments. Acrycoat 3 meets ASTM B117 1500 hour salt spray testing.

Epoxy Coating of the condenser surface, electrostatically applied, thermosetting; is also available for use in toxic or salt water atmosphere. (consult factory)

Multiple circuiting of the condenser coils to allow use of multiple compressors on a single housing air cooled condenser. (consult factory)

Receivers with outlet valves are available mounted and piped on the condensers. They are also available as a separate item to be mounted elsewhere. All receivers are provided with an outlet valve.

Variable Speed Fan Control available for head pressure control.

Fused Disconnect Switches are mounted and wired externally for ease of field installation.

Low Ambient Controls maintain head pressure at reduced ambient temperatures after operation is established.

Fused Fan Motor Contractors reduce the required amount of wiring of connections to provide for ease of field installation.

Standard Features

Cabinet is constructed entirely of mill galvanized sheet steel panels and formed structural members. All panels are removable for access and service.

Motors are industrial duty 1140 RPM, ball bearing, weather resistant, three phase with inherent electrical protection.

Fans are of heavy gauge steel with a corrosion resistant coating.

Condenser Coils are of seamless copper tube with die stamped aluminum plate fins, galvanized steel frames and tube sheets.

Unit Coolers

Information Notes

1. All unit coolers coils are factory pressure tested, using a two- stage test pressure. Coils are first pressured to 150 lbs. and submerged under water and increased to 400 lbs. for a visual test. The unit is then certified by quality control and shipped with a 5 lb. holding charge of dry nitrogen. Coils are tagged for shipment with warning label that coils are under pressure.
2. Coils are must be evacuated by the installing contractor, prior to charging the system.
3. All units are tested electrically, motors are run at the nameplate voltage, rotation and amps are recorded.
4. Just prior to crating or boxing for shipment, the unit nameplate is affixed to the unit, along with appropriate instructional and warning labels.
5. A & BOC series unit coolers are shipped upright on legs (legs are removable). The installer can lift unit in place with the shipping base for ease of installation.
6. Installation and maintenance manuals are included with each unit.

TERMS OF SALE - Net 30 days, FOB our plant

FREIGHT TERMS - All shipments are FOB our plant, with freight allowance to the first destination within the continental United States, excluding Hawaii and Alaska on shipments of 600 pounds or more.

Flush Mount Unit Coolers

STANDARD FEATURES

FV (Low Velocity)

Two Way Hinged Drain Pan
Smooth Finish Aluminum Cabin
12" Fans
Prewired Thermal Protection Motors
Copper Tubes
Full Collared Aluminum Fins
Twin Coils For Low Air Velocity
Permanently Lubricated Motors

TERMS OF SALE: FREIGHT TERMS:

Net 30 days, FOB Pryor, Oklahoma
All shipments are FOB our plant, with freight allowance to the first destination within the continental United States, excluding Hawaii and Alaska on shipment of 600 pounds or more.

FH (Low Profile)

Hinged Drain Pan
Smooth Finish Aluminum Cabinet
10" Fans
Prewired Thermal Protected Motors
Copper Tubes
Full Collared Aluminum Fins
Maximized Air Throw
Permanently Lubricated Motors
